Automated webstore and order processing

Client

- buys goods
- keeps track of his orders
- configures his opening hours & holidays
- defines the day when he must have his goods

Administrator

- tracks and screens accounts
- configures client groups with each own set of pricing
- controls offers, stocks, promotions, ...
- tracks all orders
- schedules deliveries (assisted by software)

Student: Dieter Plaetinck Supervisor: dr. ir. Annemie Vorstermans Co-supervisor: prof. ir. Werner Verschelde year 2006 - 2007

Features

MVC, ActiveRecord design patterns
